Dear Sir/Madam,

RE: APPLICATION FOR MAY TO AUGUST INTERNSHIP.

I am currently a 3rd year second semester student at Multimedia University of Kenya. I am currently pursuing a Bachelor's Degree in Software Engineering and on the lookout for active Industrial Internship for the period of May to August.

As a software engineer, my career objective is: To work in an established organization, in a challenging position that will enable me to develop problem solving skills. To be able to use my skills and knowledge working in or with a team that inspires creativity and innovation to help achieve set goals.

I have developed through my coursework vast computing skills including full stack web development, database management and programming, android programming and data science. I would wish to join your team as an Intern to gain hands on world experience on my related field of study, as well as to learn essential work ethic, team work and other various organizational and corporate principles.

For all these reasons, I would love to get interviewed and to join and become a part of the team that is working on products that are changing and touching lives everyday. Thank you for taking time to read my letter and I look forward to a potential interview with you.

Yours sincerely,

Nashon Odhiambo.
